Dr. Price's Cream Baking Powder

The highest award was given on every claim, comprising superiority in leavening power, keeping properties, purity and excellence. This verdict has been given by the best jury ever assembled for such a purpose, backed by the recommendation of the Chief Chemist of the United States Department of Agriculture, Washington, D. C., who made an elaborate examination and test of all the baking powders. This is pre-eminently the highest authority on such matters in America.

This verdict conclusively settles the question and proves that Dr. Price's Cream Baking Powder is superior in every way to any other brand.

Nors.—The Chief Chemist rejected the Alum baking powders, stating to the World's Pair jury that he considered them unwholesome.
